Colorado Department of Public Health and Environment
APCD-SS-B1
4300 Cherry Creek Drive South
Denver, CO 80246-1530

To Whom It May Concern:

Hewlett-Packard (HP) is currently in the process of demolishing building CXO01 at its Colorado Springs campus. The two emergency generators located at building CXO01 and covered under APEN number 02EP0364 have been sold and removed from the property. The cooling towers covered under APEN number 09EP1105 have also been sold and removed from the property. Therefore, HP requests APCD cancel APEN numbers 02EP0364 and 02BP1105.

In 2009 APCD issued construction permit number 09EP1103 for the installation of 16 emergency generators at the new data center on the campus, known as building CXC01. Eight generators were installed in Phase I in 2010. However, the installation of the additional eight generators in Phase II has been delayed to at least 2014. Therefore, HP is submitting the attached APEN to modify permit number 09EP1103 to reflect the current status. HP does plan to continue to limit run time hours for each generator to 100 hours/year with the end result being a reduction in permit limits by 50% to reflect eight versus 16 generators on site. Because all generators are identical, HP is submitting one APEN form with a list of serial numbers on a separate page as part of the emission calculations. HP also requests that APCD remove the diesel fuel consumption limits and tracking requirements from the permit.

Please do not hesitate to contact me at 719-548-2134 or via email at msteed@hp.com if you have any questions or comments.

Thank you,
