Subject: Request Changes to Existing Air Permits

The Hewlett Packard Company was recently split and the existing air permits held by the facilities in Colorado Springs require a change in name to the new permit holder, Hewlett Packard Enterprise Company. This name change applies to permits 09EP1103, 09EP1104 and 09EP1106. The AIRS ID Number for the facility is 041/0223. The general APEN form and APCD Construction Permit Application are attached to this letter.

If you have any comments or questions regarding the above requests please do not hesitate to contact me.

Sincerely,
Hewlett Packard Enterprise Company

Subject: Request Changes to Existing Air Permits

During a recent audit of the Hewlett Packard Enterprise Company (HPE) facility in Colorado Springs (AIRS ID Number: 041/0223/012), there was a finding stating that permit 09EP1103 contained the incorrect serial numbers for the eight emergency generators covered by the permit. This is a formal request to modify permit 09EP1103 to contain the correct serial numbers. The requested changes are included in the attached documentation, including the APEN form.

Additionally, in a recent meeting with APCD officials, HPE was advised that the source category for the facility was listed incorrectly in the division's database as a synthetic minor. Based on actual emissions, the correct source category should be listed as a true minor source. HPE requests this change be made to the database.

If you have any comments or questions regarding the above requests please do not hesitate to contact me.

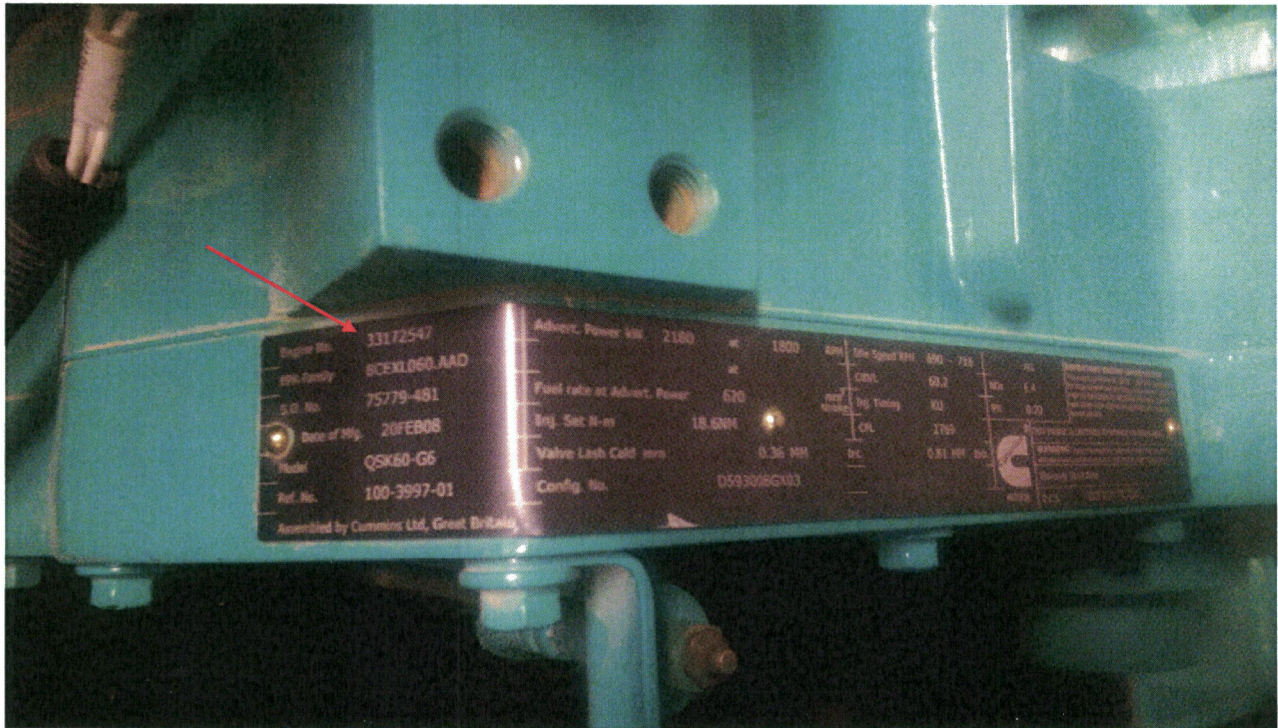

Sincerely,
Hewlett Packard Enterprise Company
